Maintaining Character

Brick Cleaning Comparisons
all Before → After

Mortar, Plaster or Render back to clean brick

The Ashrose Group specialise in using a low pressure sand jetting system that has been used nationwide for property restoration, including gaining approval for and subsequently working on many Listed Buildings.

The system, in our trained hands, causes minimal damage to an underlying surface and is flexible enough to tackle most property restoration cleaning tasks.

Bricks can be cleaned 'back to pink' as at the Goole Shipyard (top right), or alternatively (and more commonly) cleaned to a lesser level where character is maintained.

- The System Cleans Bricks, Stone, Wood
- Cleans Inside and Outside
- Little damage to pointing, very little damage to the faces of the brick
- Environmentally Friendly, No Fumes or Toxic Waste
- Low Consumption means less subsequent cleaning up
- Low Pressures eliminate secondary mess inside buildings, and minimises surface damage.
- Competitive Prices
