Sand Jetting - quick and effective - surface can be left dusty to discourage rapid re-graffiti

Chemical Stripping of Graffiti from Painted Surface

The Ashrose Group specialise in using a low pressure sand jetting system that has been used nationwide for property restoration, including gaining approval for and subsequently working on many Listed Buildings.

The system, in our trained hands, causes minimal damage to an underlying surface and is flexible enough to tackle most property restoration cleaning tasks.

- The system cleans Bricks, Stone, Wood, Concrete and leaves no 'ghost' images of removed graffiti. It is very effective on textured surfaces
- Cleans Inside and Outside
- Environmentally Friendly, No Fumes or Toxic Waste
- Low Consumption means less subsequent cleaning up
- Low Pressures eliminate secondary mess inside buildings, and minimises surface damage.
- Chemical Stripping using Napier's Environmentally Friendly SARA technology available for cleaning graffiti from glass, UPVC etc. Surfaces where sand jetting is inappropriate.
- Competitive Prices
- Subsequent Sealing and Protection of Surfaces using Epichem's Dynasytan™ Sealing and Anti-Graffiti Products. These allow Graffiti in the future to be washed off easily, yet leaves surfaces their original colour - without shine - and allows them to breathe.
