

# PAINTED STONE CLEANING

See also [www.ashrose.com](http://www.ashrose.com) and  
[www.surfprep.co.uk](http://www.surfprep.co.uk) for more examples

The Ashrose Group specialise in using a low pressure sand jetting system that has been used nationwide for property restoration, including gaining approval for and subsequently working on many Listed Buildings.

The system, in our trained hands, causes minimal damage to an underlying surface and is flexible enough to tackle most property restoration cleaning tasks.

Chemical Stripping using Napier's Environmentally Friendly SARA technology available for cleaning paint from delicate surfaces or where sand jetting is inappropriate.

- Cleaning of Bricks, Stone, Wood. Inside and Outside
- Little damage to pointing, very little damage to the faces of the stone
- Environmentally Friendly, No Fumes or Toxic Waste
- Low Consumption means less subsequent cleaning up
- Subsequent Sealing and Protection of Surfaces using Epichem's Dynasytan™ Sealing and Anti-Graffiti Products. These allow Graffiti in the future to be washed off easily, yet leaves surfaces their original colour - without shine - and allows them to breathe.
- Low Pressures eliminate secondary mess inside buildings, and minimises surface damage.
- Competitive Prices

Note: removing paint from a surface is considerably more messy than simply cleaning a surface; not only is more abrasive used, but the paint is sometimes a bulky waste product too!
